SENATE

Senate Bill No. 1282

INTRODUCED BY HON. MANNY VILLAR

EXPLANATORY NOTE

The country has witnessed the escalation of crimes with syndicates habitually committing crimes to the detriment of peace and order and the public welfare. Individuals and families have been victimized and brutalized in heinous crimes, with criminals committing them with impunity due to their political connections. To aggravate the situation, law enforcement personnel who are supposed to be protectors of the people take advantage of their positions also in the pursuit of lawless undertakings.

The identification of the criminal elements which are often out in the open is therefore essential for crime eradication. Law enforcement could quickly resolve cases being investigated if they have immediate access to updated criminal records. This can be done if there is a national crime database, which will therefore not only be used for obtaining the necessary job or police clearances.

This bill seeks to establish a national crime database that will be useful in the elimination of crime and criminal elements.
