**EXPLANATORY NOTE**

“It is the policy of the State to promote a high standard of ethics in public service. Public officials and employees shall at all times be accountable to the people and shall discharge their duties with utmost responsibility, integrity, competence, and loyalty<sup>1</sup>.” In order to discharge this, even the slightest appearance of impropriety by government officials and agencies is frowned upon and consequently prohibited.

When a non-government entity occupies a portion of a government office, the physical closeness creates an impression of intimacy and the possibility of mutual influence. This presence of a non-government entity unintentionally operates as an endorsement for whatever purpose of the non-government entity. The biggest danger of having a government and a non-government entity situated in the same vicinity is the possible leakage and mishandling of sensitive and classified government information to those who are not authorized to possess the same.

As aptly stated by Sen. Aquilino Q. Pimentel, Jr. when he originally filed this legislation in the 14th Congress,:

“This measure in no way prohibits consultation or the provision of assistance to the government. As we all know, there are many areas where government needs the participation of the private or of the foreign sector where in such cases such sectors have more experience or expertise. What is prohibited is the actual occupation by these non-government entities of government office premises, as well as the provision of any material support by the government to the offices of these non-government entities.”

Hence, the approval of this initiative is earnestly sought.
